## **WHY YOU GET THE BEST- WHEN YOU BUY FROM US!**

Our trees, shrubs, evergreens, etc, are grown for high-class landscape work in order to give an immediate effect when set out.

Our plants are grown on fertile soil and well-spaced in rows. All our nursery stock is well fertilized periodically in order to get the best color in the plants and at the same time keep them in the healthiest condition.

Our plants are given individual attention in the proper shearing so as to put them in the best possible balanced symmetrical shape and to give them the most compact bodies possible.

Our nursery stock is many times transplanted, giving them the chance to develop the fine, fibrous root system, so necessarily needed in order to move these plants with ease and safety.

Weeds are constantly being eliminated and the ground kept moist by constant cultivation by horse, by machinery and by hand hoeing.

Spraying is done, when needed to rid the plants of any insect pests.

Therefore, we take great pride in saying that we grow some of the best specimen stock to be found anywhere in this section of the country.

When you are in the vicinity, drop in at our Nurseries and let us show you our nursery stock.
